ULTIMHEAT®

PRESSURE SWITCHES

Air switches
Positive Pressure switches
Vacuum pressure switches
Differential pressure switches

Elastomer membrane types, medium pressure range
(20 to 1500 mbar)

The professional solution: an extended, rational, and consistent range of products

Technical catalogue for R&D department

Edition 31/05/2013

Differential pressure switches

En raison de l'évolution technique constante de nos produits, les plans, dessins, photos et caractéristiques repris dans les pages techniques sont communiqués sans engagement et peuvent être modifiés sans préavis

Low pressure, slow action contact differential pressure switches for it printed circo boards with 6.35mm pitch SPNO contact : Type ZH

DIMENSIONS

Uses: Low voltage, high sensivity

Main applications: Electronic printed circuits. Detection of low positive, negative or differential pressure. Measurement of liquid levels, air flow, filters efficiency. Very small differential, about 2 millibars

Membranes: EPDM, dia 22 mm. Silicone or NBR on request

Fluid: water or air (no liquid input on the negative pressure inlet)

Fitting: two plastic spouts dia 4 mm for soft PVC tube 3x6 mm (1/8")

Pressure: Differential

Housing: PA66, UL94 VO

Contact: single pole normally open, slow action.

Electrical rating:

- Silver contact: max 1A 250V

- Gold plated contact: max 100 mA, 24V

Action: momentary, close by pressure rise on positive pressure inlet

Set point calibration: factory calibrated and sealed, not field adjustable

Set point calibration limits: from 10 to 400 mbar

Differential: less than 5 mbar

Electrical connection: printed circuit terminal, dia 1.2 mm, 12.7mm spacing

Maximum pressure: 500 mbar (7 PSI)

Ambient temperature limits: 0 to 85°C

References:

Medium pressure, slow action contact differential pressure switches, 6.35x0.8 mm terminals

SPNO contact : Type ZA

DIMENSIONS

Uses: Low voltage, high sensitivity

Main applications: Detection of medium positive, negative or differential pressure. Measurement of liquid levels, water filters efficiency.

Membranes: EPDM, dia 22 mm. Silicone or NBR on request

Fluid: water or air (no liquid input on the negative pressure inlet)

Fitting: two plastic spouts dia 4 mm for soft PVC tube 3x6 mm (1/8"). On request threaded fitting on positive inlet

Pressure: Differential

Housing: PA66, UL94 VO

Contact: single pole normally open, slow action. NC contact is available on request (MOQ)

Electrical rating:

- Silver contact: max 1A 250V

- Gold plated contact: max 100 mA, 24V

Action: momentary, close by pressure rise on positive pressure inlet

Set point calibration: factory calibrated and sealed, not field adjustable

Set point calibration limits: from 10 to 400 mbar

Differential: less than 10 mbar

Electrical connection: two 6.3 x 0.8 mm quick connect terminals

Maximum positive pressure: 1000 mbar (15 PSI)

Maximum negative pressure: minus 500 mbar

Ambient temperature limits: 0 to 85°C

Medium pressure, slow action contact differential pressure switches , waterproof, IP65 SPNO contact : Type ZC

DIMENSIONS

Uses: Low voltage, high sensitivity . For use in places where IP65 is requested

Main applications: Detection of medium positive, negative or differential pressure. Measurement of liquid levels, water filters efficiency.

Membranes: EPDM, dia 22 mm. Silicone or NBR on request

Fluid: water or air (no liquid input on the negative pressure inlet)

Fitting: soft PVC tube 3x6 mm (1/8") length 200 mm on negative inlet. 4 mm diameter spout or plastic fitting on positive inlet.

Pressure: Differential

Housing: PA66, UL94 VO, PVC and ABS

Contact: single pole normally open, slow action. NC contact is available on request (MOQ)

Electrical rating:

- Silver contact: max 1A 250V

- Gold plated contact: max 100 mA, 24V

Action: momentary, close by pressure rise on positive pressure inlet

Set point calibration: factory calibrated and sealed, not field adjustable

Set point calibration limits: from 10 to 400 mbar

Differential: less than 10 mbar

Electrical connection: 500 mm cable, AWG24, UL style 2464

Maximum positive pressure: 1000 mbar (15 PSI)

Maximum negative pressure: minus 500 mbar

Ambient temperature limits: 0 to 85°C

Available pressure inlet fittings ①
