Thermostat and temperature sensor boots

Type 9BF

Applications

They are designed to protect thermostats or temperature sensors against accidental contact or liquid ingress. Depending on the model, they can be filled with resin or simply be glued or vulcanized on their support, flexible or not.

Main features

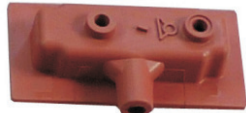

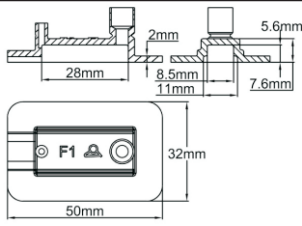

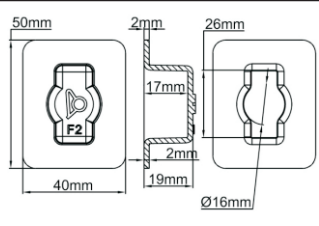

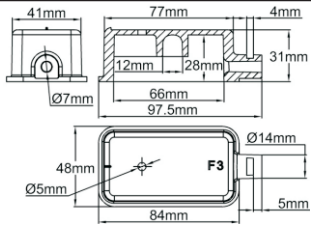

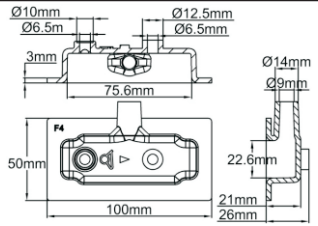

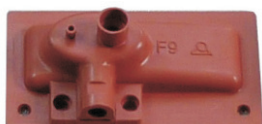

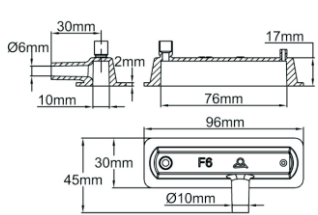

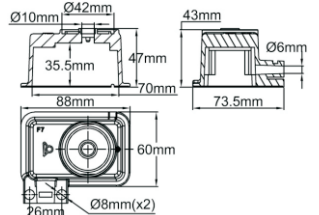

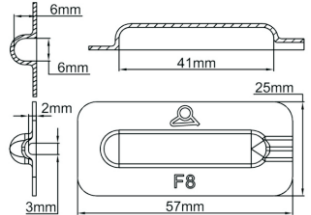

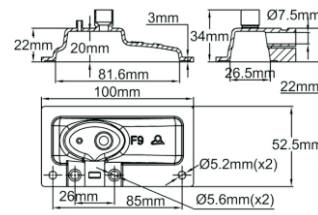

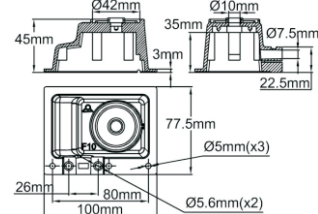

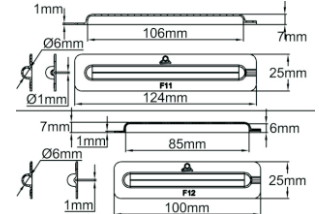

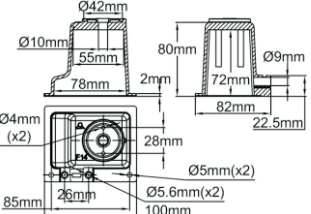

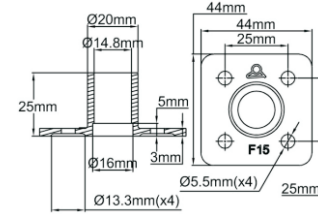

Flammability: UL 94-V0

Hardness: 60 Shore A

Color: black or orange depending on the model. Other colors available (MOQ apply)

NB: As new references are added regularly, ask an updated list if you intend to use these products.

Many other models of silicone boots for thermostats and temperature sensors can be found in our catalog No. 2

9BF01R000SPH016A (F1)	9BF02R000SPH008A (F2)	9BF03R084SPH020A(F3)	9BF04R100SPH006A(F4)
			
			
Silicone boot with resin filling orifice, for miniature limit thermostat, PT100 and NTC sensors	Silicone boot for 1/2" disc thermostat, with internal connection	Silicone boot for adjustable bimetal strip thermostat	Silicone boot for adjustable bimetal strip thermostat, with pilot light.
