

Snap action contact miniature vacuum switch, DPDT contact

Plastic fitting : Type ZT

DIMENSIONS

Uses: High electrical rating, for 250V.
Main applications: Vacuum detection on pumps, filters, ventilation, and electrical appliances.
Membranes: EPDM, dia 22 mm. Silicone or NBR on request. Double membrane on request.
Fluid: water or air
Fitting: Plastic
Pressure: negative (Vacuum)
Housing: PA66, UL94 VO
Contact: two SPDT switches, snap action. NO or NC contacts available with MOQ
Electrical rating: Depends on micro-switch operating force that is linked to the electrical rating
 - Standard rating micro-switch (medium and high vacuum calibration only): 16A 125/250VAC; 1/2HP 125VAC; 3/4HP 250VAC. Differential about 60 mbar
 - High rating micro-switch (medium and high vacuum calibration only): 2HP 240V, 21(8) A 240V (UL, CSA VDE switch). Differential about 90 mbar.
 - Low force micro-switch (vacuum less than minus 150 mbar): 1/4HP 6(1) A 240V (UL, CSA VDE switch) Differential about 40 mbar.
 - On request: up to 25A 250V
Action: momentary.
Set point calibration: factory calibrated and sealed, not field adjustable
Calibration condition: the contact between Com and NC opens when vacuum pressure goes from atmospheric pressure to requested vacuum set point.
Set point calibration limits: from minus 50 to minus 700 mbar
Electrical connection: 6.35 x 0.8 mm quick connect terminals
Maximum pressure: 4 bars (59 PSI)
Maximum vacuum: minus 700 mbar (relative pressure)
Ambient temperature limits: 0 to 85°C

Available pressure inlet fittings ①
